

Customized Products and Services

Scientists and analysts often encounter difficulties from finding analytical standards in analysis and testing work, especially for some unconventional inspections and emergencies, that may be the key points of the successful analysis. The technical team of Alta Scientific has more than 30 years of experiences in organic synthesis, fine reagents and analytical standards, a number of inventions, proficient in the design, synthesis, purification and quality control of small organic molecules. As a national high—tech enterprise with top—level R&D ability and production capability of organic standards, Alta's technical team also provides professional services of customized analytical standards with short lead time, accurate valuation, reliable quality, cost efficiency, and on time technical supports.

• Customized Standards: Structural based rational design and synthesis of customized standards to meet the customer's needs.

Case study: The detection of fipronil and its metabolites fipronil-desulfinyl, fipronil-sulfide and fipronil-sulfone has attracted the attention of many research institutes and third-party testing organizations after "poison egg" event. However, there are difficulties for immediate or fast supply of the fipronil and metabolites on

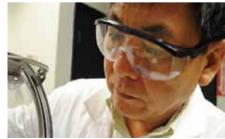

the market. Alta's technical team took quick action, synthesized qualified products and put on the market in only 2 weeks, satisfied customer requirements.

• Customized Mix Standard Solutions: Design and make customized mix standard solutions according to the components provided by the customer.

Case study: One customer requests the mix standard solution of "GB/T 19648-2006, Determination of 500 Pesticides and Residues in Fruits and Vegetables by Gas Chromatography-Mass Spectrometry". However, the full collection of 500 pesticide and residue standards is very expensive and difficult, preparation of mix standard solution encountered many difficulties and mistakes. Alta technic team successfully solved the problems and provided qualified products to meet the customer's needs, greatly reduced costs and improved work effectiveness.

Quality Assurance

- ◆ Developed by A ChemTek, USA, manufactured, sold and supported by Alta Scientific Co., Ltd. in China.
- ♦ ISO 9001 Management Accreditation. Implemented ISO 17025, ISO 17034 Quality Management System.
- ◆ HPLC/LCMS, GC/GCMS, NMR, etc. for Quality Control.
- ◆ Certificate of Analysis (CoA) and Safety Data Sheet (MSDS) provided.
